## DX news

### **E44OM Palestine -update September 16-17**

1. There's been a lot of work on the antenna set up this morning at E44OM. Radovan, OM2ZZ reports they had a problem with antenna interaction, so they have rearranged them on the hotel roof. On 160m, there's problem with heavy QRN (S9+++). They have decided to focus on other bands, because top band is non-workable from E4.
2. Today CW by OM2ZZ and SSB by OM2DX. Stevo OM3RG had to fly back home last night due to family reasons. Jan OM2IB is joining us again tonite. Team say they're doing their best to keep radios running. Well over 25K QSOS in the [log](#).

### **FP5KE St Pierre & Miquelon -update September 16**

We received the 11 missing pieces of luggage late yesterday afternoon. The installation of the antennas continued until nightfall as well as today morning. With the exception of the 6m beam, all our antennas are now installed.

The WX of the first two days has been quite pleasant (between 10 and 15°C) with, however, a lot of wind. But we still encounter an annoying problem: the generator of the house we rent was advertised as 15 kVA but ultimately only makes 6 kVA which is very little given the number of stations we have.

Thanks to the solidarity of the inhabitants of Saint-Pierre, and under the leadership of FP5AC, we obtained the loan of a second 4 kW generator (thanks Stéphane!). It is certainly not yet sufficient and we cannot use the planned power, but it is better than nothing and it allowed us to start traffic this afternoon (almost 24 hours late).

### **CY0S Sable Dxpediton 2026 -update**

The CY0S DXpedition team is very pleased to announce the official dates for the Sable Island DXpedition. The dates are March 19-30/31, 2026.

Our team would like to thank Mathieu D'Astous, the Parks Canada – Sable Island manager for working with our team and approving these dates.

In the last few weeks, preparations have ramped up for the DXpedition. The Yagi antennas for 10-20 meters have been cleaned, assembled and tested. They are now safely stored in their respective ski bags. Work is ongoing with the Spider Poles and the low band antennas. Work should be completed with those antennas in October.

### 3Y0K Bouvet Island -update

Ken, LA7GIA updates to say the team completed a major milestone! The 3Y0K container is now packed and ready to be shipped to Bouvetøya! Picture credit 3Y0K Facebook page.
