AU7RS Lakshadweep -update February 19

The AU7RS DXpedition team acknowledges recent anonymous posts questioning the team's operational choices, including mode and band selection.

"We operate based on propagation conditions, aiming to provide All Time New Ones (ATNOs) to as many DXers as possible," said the team leader. "Our priority is to maximize the number of contacts, rather than focusing on individual bands or modes."

The team notes that operating in this remote location comes at significant expense and effort, and appreciates understanding and support from the DX community. "We built this team over years, leveraging our experience in CW, SSB, and digital modes," the team leader added.

The AU7RS DXpedition will continue operations tomorrow with one radio, focusing on 10m-40m, with scheduled ATNO contacts.

QO-100 operation at AU7RS

New digital mode: FT2 (by Martino IU8LMC developer)

FT2 is not a theoretical concept. It is fully working software, tested and operational.

On February 16, 2026, we successfully completed dozens of real contacts in FT2 mode, with transmission cycles of 3.8 seconds — four times faster than FT8 and twice as fast as FT4. QSOs were verified on two bands (40 meters and 80 meters) with stations in Campania, Capri, Sardinia, and Turin. Signals were successfully decoded down to -12 dB signal-to-noise ratio.

FT2 uses the same codec as FT8 and FT4: 77-bit payload, LDPC (174,91) encoding, 8-GFSK modulation. The only difference is the time compression: shorter symbols, cycle reduced to 3.8 seconds. The result is a complete QSO in 7-11 seconds, compared to the full minute required in FT8.

VPOSG South Georgia Island -update

ARDXpeditions is now actively fundraising for the **VPOSG** South Georgia DXpedition. Your contribution will directly support vessel charter, transport, permits, fuel, and essential equipment for this major operation. If you would like to support the project, you can donate securely via PayPal at [this link](#). Every contribution — large or small — helps bring VPOSG on the air for the global amateur radio community. Thank you for your support.

KP5/NP3VI Desecheo Island -update February 17 1800z

It's a beautiful sunny day at Desecheo. The forecast for the week looks promising. Expect ongoing operation. Thank you for support.

We have now exceeded 75,000 QSOs using our fully solar-powered, unattended Remote Deployment Unit. This marks 35 days of operation since we began on January 12, 2026 demonstrating the reliability and effectiveness of this first-ever approach to activating a rare DXCC entity using renewable energy. Current statistics show 75,285 QSOs and 16,011 unique callsigns in the log.

TL8BNW Central African Republic -update by Joao CR7BNW

Unfortunately, on 31st January, my small linear amplifier finally gave up the ghost. It had performed far beyond expectations, but the workload proved too much in the end. From that moment on, it became a true race against time to secure a replacement that was immediately available. I would like to express my sincere appreciation to Marcus at HAMSHOP MOBILE, who managed — within just one week — to arrange for an SPE Expert 1.5K TAURUS to be delivered to Portugal, allowing me to bring it here to Bangui this week.

RI1FJL Franz Josef Land -update by Vasily R7AL

Today we passed first important milestone of our upcoming RI1FJL dxpedition, which is scheduled for late August – early September 2026.

We paid the first \$20000 for the vessel and signed the contract with the skipper. So it's no way back for sure -))

However, we are still waiting for the permission to stay on the Polar Observatory facilities, but confident we'll get it soon.

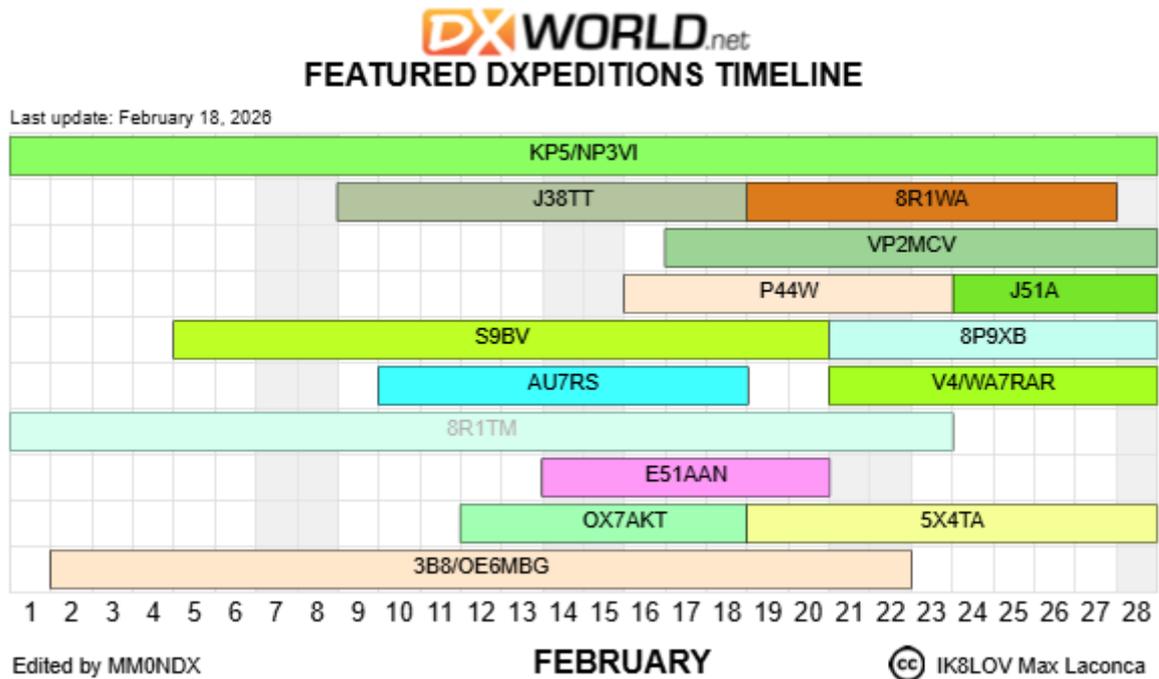

A big thanks to all Clubs, Foundations and Individual Donors who already supported our DXpedition. RI1FJL team really appreciate your Support!

We raised 3000\$ so far but the budget deficit remains large. We kindly invite you to support our effort! (Website link at bottom).

Neumayer Station

New ham operator Lasse, DL9LU is active during the entire winter as DP0GVN until December 2026. QSL via OQRS.

Vostok base by Alex UG1A

After Vostok, says Frank (F8DVD), there's a possibility that Alex will go to Ridge B and operate from there. Nothing is certain about that yet so more info later. However, it would be an ATNO for the Worldwide Antarctic Program (WAP) and Polar DX Challenge as Ridge B has never been activated before.

A new callsign have been assigned to Alex for all operations during this season: RI1ANI.

Since 2007, Alex was very active from Progress and Vostok base, mostly in CW but also in SSB with many calls such as R1ANC, R1ANP, RI1ANC, RI1ANV, RI30ANT.

NOTE: Ridge B is one of the least studied areas in Antarctica but has been considered to be a potential location for the oldest ice on Earth. In January 2020, the first scientific traverse from Russia's Vostok Station to the topographical dome of Ridge B was carried out. Ridge B (Dome B) is 3807m above sea level, 79.02°S, 93.69°E).
